Igor Pankin

Finance Systems & ERP Product Lead · Oracle Fusion Financials / EBS · SaaS/PaaS · AI-enabled delivery for ERP at customer sites

Limassol, Cyprus · igor@igorp.com · linkedin.com/in/igorpankin · cv.igorp.com · github.com/ExiosV

PROFILE

Finance-systems and ERP leader with 20 years in Oracle E-Business Suite and Oracle Fusion Financials (Oracle ERP Cloud). Delivered a portfolio of 6 financial ERP projects with over EUR 4.5M revenue, about EUR 1.4M profit and ROI above 30%, owning scope, budget, team and P&L. I run implementation, custom development, SaaS/PaaS extensions and integrations with finance, supply-chain and procurement systems, take part in pre-sales, and build and deploy AI tooling for ERP delivery on customer sites. 16 years in one group, from consultant to product and delivery lead. Based in Limassol.

KEY RESULTS

- Portfolio of 6 projects 2014–2025 (EUR 4.5M+ revenue, about EUR 1.4M profit, ROI above 30%); maintained an 11-year ERP delivery relationship through consecutive contracts (2014–2025).
- Oracle ERP Cloud implementation for a major enterprise (three waves, go-live within 12 months) with its international team and a global integrator; later led the two-year migration of the same customer's ERP platform (hundreds of users, joint team of up to 50) with no interruption to financial close.
- SaaS statutory-reporting service built from scratch as an Oracle ERP extension (first release within a year, 300+ users), followed by a five-year PaaS support contract; official Oracle localisation solution for Russia as an Oracle Platinum partner.
- AI agents in delivery work: developing AI-assisted workflows across ERP delivery (2026); automated IFRS and management P&L reporting for group finance (2026). Hands-on: own agent platform in production, github.com/ExiosV (page 2).

EXPERIENCE

Softline Group (Borlas Group) · 2010 – present · Oracle Platinum partner for ERP consulting, development and support

Project Delivery Manager (formal title: Lead Consultant) 2021 – Present

- Own scope, budget, team and P&L of financial ERP projects and in-house products (portfolio figures above).
- Led the two-year migration (2023–2025) of a large enterprise's financial ERP platform (applications, integrations, reports, data; hundreds of finance users) with no interruption to financial close; a joint team of up to 20 consultants and 20–30 customer staff; project manager and functional architect (P2P, O2C).
- Implemented 5 finance and tax areas for an industrial customer over 2021–2024 (cash management, fixed assets, Russian tax, EDI and bank-statement integration) and trained its key users.
- Supported 5 large pre-sales in 2025–2026 (telecom, chemicals, energy, mining): proposals, estimates, an IT-audit bid and sales materials.
- Developing AI-assisted workflows for ERP delivery (2026), expanding from project analysis and reporting into broader delivery phases as the rollout progresses.
- Automated 3 reporting streams for group finance in 2026 (IFRS, cash cycle, management P&L), replacing manual spreadsheet consolidation.

Project & Product Manager (formal title: Senior Consultant) 2018 – 2021

- Delivered an Oracle Fusion Financials (Oracle ERP Cloud) implementation for a major enterprise (three waves, go-live within 12 months, hypercare) alongside its international head-office team and a global integrator; project manager and P2P consultant.
- Built a SaaS statutory-reporting product from scratch as an extension of Oracle ERP and took it to customers: first release within a year, 300+ users; product owner for roadmap, requirements and customer feedback.
- Developed and distributed the official Oracle localisation solution for Russia as an Oracle Platinum partner (three-year vendor engagement).

Senior Consultant 2013 – 2018

- Owned functional design and development of financial modules, reports and localisation features for global industrial and retail customers; delivered ERP design and development across multiple global industrial and retail customers.
- Delivered the Russian localisation of Oracle E-Business Suite as part of customers' international teams (in English, on-site at customer headquarters, with their outsourcing contractors).

Software Consultant 2010 – 2013

- Delivered 3 systems in three years for energy retail, utilities and logistics customers: two request-payment (treasury) systems and a forwarding-management system integrated with CRM, transport management and 1C.

Junior Analyst / Consultant, GMCS 2006 – 2009

- Contributed to the Oracle E-Business Suite financials implementation (GL, CE, TR, AP) at a state telecom holding; the project went live on time. Wrote functional designs, tested modules and trained junior consultants and key users.

SKILLS

Oracle ERP Cloud / EBS (AP, AR, GL, CE, SLA, Procurement, Treasury) · ERP implementation and custom development · SaaS/PaaS · integrations (1C, CRM, EDI, banks) · IFRS and tax reporting · delivery management: scope, budget, P&L, risk register, change control, plan-vs-actual reporting, capacity and release planning, vendor management · estimation and pre-sales · stakeholder management · AI agents, Python, SQL/PL-SQL

EDUCATION & LANGUAGES

Lomonosov Moscow State University
Oracle-certified (Financials Cloud, E-Business Suite)
English B2 (upper-intermediate; daily work with international teams and global integrators) · Russian (native)

Igor Pankin — details

Technical profile, keywords and project history (customers by request).

TECHNICAL PROFILE AND KEYWORDS

Oracle ERP: Oracle E-Business Suite 11i and R12 (Payables, Receivables, General Ledger, Cash Management, Subledger Accounting, Oracle Payments, Bank Cash Management, Assets, Treasury, Inventory, iProcurement, Purchasing, eBusiness Tax); Oracle Fusion Financials / Oracle ERP Cloud (P2P, R2R, O2C), FBDI, OTBI, BI Publisher.

Localisation and tax: Russian localisation (CLE) on 11i and R12, VAT books and registers, tax and statutory reporting, electronic documents, multi-period accounting, revaluation, bank statement reconciliation.

Development and platforms: PL/SQL, Forms Personalization, Workflow, Web ADI, BI Publisher reports, REST API, WebLogic/Java platform administration of a PaaS reporting service, SQL.

Integration: 1C, Siebel CRM, Oracle Transport Management, electronic document operators (Diadoc), bank payment files and statements, file and API interfaces, integration monitoring.

Management: scope, budget and P&L ownership, estimation and proposals, pre-sales support, PMO, stakeholder and customer management, risk register (RAID) and change control, plan-vs-actual reporting, capacity and release planning, vendor and integration management, AIM methodology, Jira/Confluence.

Product: product ownership of a PaaS/SaaS service, roadmap and backlog, requirements, customer feedback loops, launch and distribution through a partner channel.

AI and automation: AI agents in delivery routines (document consolidation, transcript enrichment, progress reporting), agent frameworks (LangGraph, Claude Code, MCP), RAG, LLM workflows, n8n, Python, Docker, Kubernetes, infrastructure as code, Telegram and Google API automation.

PROJECT HISTORY (ANONYMISED)

2023 – 2026	**Large enterprise**	Financial ERP platform migration, improvement and support; project manager and functional architect (P2P, O2C); product owner of a PaaS statutory-reporting service.
2026	**Enterprise ERP rollout**	AI-assisted workflows for delivery analysis, reporting and coordination, being expanded across delivery phases.
2022 – 2023	**Internet company**	Web application for the Treasury to manage payments; project manager, solution architecture and integration.
2021 – 2024	**Industrial customer**	Oracle EBS R12 financials and tax implementation with Russian localisation: cash management, fixed assets, e-documents (EDI) integration, bank statements, key-user training.
2019 – 2023	**Global software vendor (Russia)**	Support of finance and procurement localisation for Oracle EBS R12; project manager, functional architect.
2018 – 2019	**Major enterprise**	Oracle ERP Cloud implementation (waves, go-live, hypercare) with global team and integrator; project manager, P2P consultant; product owner of the PaaS reporting service.
2020	**Consumer appliances manufacturer**	IT audit of an EBS R12 implementation and its integration with 1C; finance systems expert.
2016	**Fertilizer producer**	EBS R12 implementation: treasury, payments, cash management.
2015 – 2016	**International media company**	Functional support of EBS 11i, 11i replication, localisation consultant in the global team (AP, AR, GL, CE).
2012 – 2014	**Global industrial customers, DIY retail**	EBS R12 implementations with Russian localisation in global teams; treasury and financial operation management application with developments in BCM/AP/CM.
2010 – 2012	**Logistics, utilities, energy retail**	Request-payment (treasury) systems on EBS 11i; forwarding-management system with integrations to CRM, transport management and 1C.

AI AND AUTOMATION PROJECTS (OWN, IN PRODUCTION)

omb-agent	Multi-agent AI platform: LangGraph supervisor behind a FastAPI service, RAG on LlamaIndex and Qdrant, 80+ reusable skills over MCP, one gateway to 50+ local and cloud model routes (LiteLLM) with tracing (Langfuse). Runs my own workflows from Telegram and web chat.
Self-hosted Kubernetes platform	90+ services and jobs in a home k3d cluster as code: GitHub Actions deploys, Renovate, Cloudflare Tunnel and Access, secrets out of git, metrics and traces (VictoriaMetrics, Grafana).
tg-bridges	Telegram assistant with LLM digests of unread channels, reaction tracking and alerts; async Python, any OpenAI-compatible model.
Personal data pipelines	Telegram-to-Google-Photos backup, Garmin LiveTrack emails to Telegram, rental-listing feed, blog mirror: scheduled, idempotent, with token-expiry alerts.
